

Vax Case Study

Vax (Aug 2015 -Present)

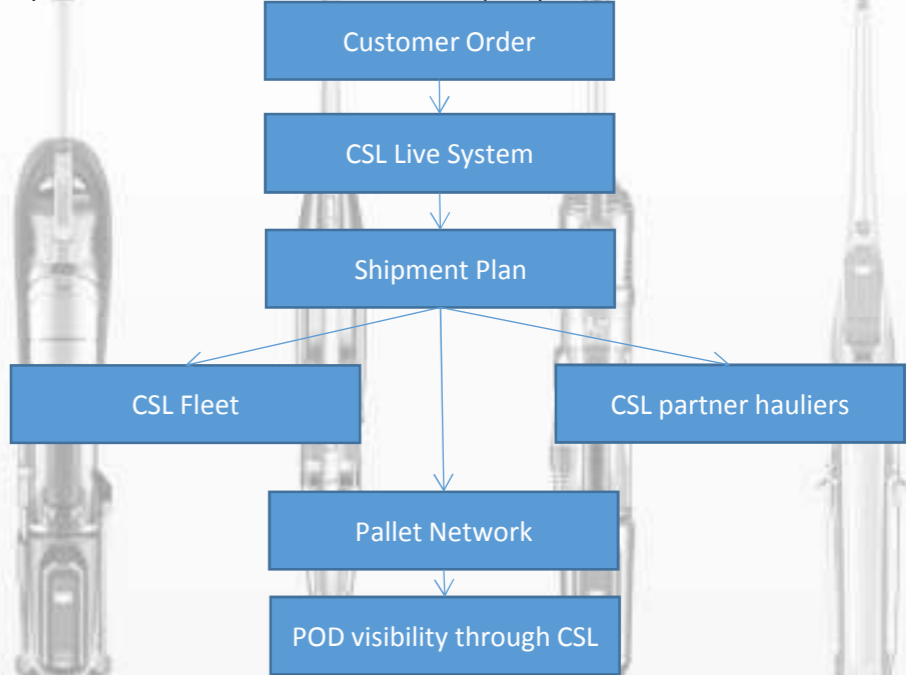

We manage the delivery of all palletised product from Vax's purpose built 230,000 sq ft distribution centre in Droitwich

- FTL and LTL dynamic planning, scheduling and distribution managed through our CSL Live system
- On-site management team to ensure accurate communication and immediate resolution to any issues
- Integration of systems to allow timely and accurate flow of information and improve planning
- Product orders fulfilled through a mix of CSL fleet, 4pl and pallet network
- Management and delivery of Hazardous product
- Reverse logistics control and management
- Shipment tracking and development of automated POD reporting systems

Planning / Load Consolidation

Dynamic system that identifies opportunities from the order book in order to establish the most cost effective method for delivery; be that consolidated full load or pallet network or distribution on lower capacity vehicles.

Process is ensuring that distribution cost is minimised whilst elevating service standards.
